HMS Endeavour, også kendt som HM Bark Endeavour, var et britisk Royal Navy forsknings fartøj, som Løjtnant James Cook var befalingsmand på, på sin første opdagelsesrejse til Australien og New Zealand, 1769-1771.

Hun blev lanceret i 1764 som collier Jarl af Pembroke, og flåden købte hende i 1768 til en videnskabelig mission til Stillehavet og til at udforske havene omkring Terra Australis Incognita eller "det ukendte sydlige land".
Flåden omdøbte og bestilte hende som Hans Majestæt Kongen Bark Endeavour. Hun forlod Plymouth i august 1768 rundede Kap Horn, og nåede Tahiti i 1769.
Hun satte derefter sejl ind i et stort set uudforsket hav mod syd, stopper ved Stillehavsøerne i Huahine, BoraBora og Raiatea for at Cook kunne kræve dem for Storbritannien. I september 1769 lagde hun anker ud for New Zealand, det første europæiske fartøj til at nå øerne siden Abel Tasmans Heemskerck 127 år tidligere.

I april 1770 blev Endeavour det første skib til at nå den østlige kyst af Australien, da Cook gik i land på, hvad der nu er kendt som Botany Bay. Endeavour sejlede derefter nordpå langs den australske kyst. Hun undgik med nød og næppe en katastrofe efter grundstødning på Great Barrier Reef, og Cook var tvunget til at smide sine kanoner overbord for at gøre hende lettere. Han strandede hende på fastlandet i syv uger for at tillade rudimentære reparationer på hendes skrog. Den 10. oktober 1770 humpede hun i havn i Batavia (som nu hedder Jakarta) i Hollandsk Ostindien, for flere væsentlige reparationer, med hendes besætning som havde tavshedspligt om de landområder, de havde opdaget. Hun genoptog sit vestlige færd den 26. december og rundede Kap det Gode Håb den 13. marts 1771 og nåede den engelske havn i Dover den 12. juli, efter at have været på havet i næsten tre år.

GB

HMS Endeavour, also known as HM Bark Endeavour, was a British Royal Navy research vessel that Lieutenant James Cook commanded on his first voyage of discovery, to Australia and New Zealand, from 1769 to 1771.

She was launched in 1764 as the collier Earl of Pembroke, and the Navy purchased her in 1768 for a scientific mission to the Pacific Ocean and to explore the seas for the surmised Terra Australis Incognita or "unknown southern land".
The Navy renamed and commissioned her as His Majesty's Bark the Endeavour. She departed Plymouth in August 1768, rounded Cape Horn, and reached Tahiti in time to observe the 1769 transit of Venus across the Sun. She then set sail into the largely uncharted ocean to the south, stopping at the Pacific islands of Huahine, Borabora, and Raiatea to allow Cook to claim them for Great Britain. In September 1769, she anchored off New Zealand, the first European vessel to reach the islands since Abel Tasman's Heemskerck 127 years earlier.

In April 1770, Endeavour became the first ship to reach the east coast of Australia, when Cook went ashore at what is now known as Botany Bay. Endeavour then sailed north along the Australian coast. She narrowly avoided disaster after running aground on the Great Barrier Reef, and Cook had to throw her guns overboard to lighten her. He then beached her on the mainland for seven weeks to permit rudimentary repairs to her hull. On 10 October 1770, she limped into port in Batavia (now named Jakarta) in the Dutch East Indies, for more substantial repairs, her crew sworn to secrecy about the lands they had discovered. She resumed her westward journey on 26 December, rounded the Cape of Good Hope on 13 March 1771, and reached the English port of Dover on 12 July, having been at sea for nearly three years.

D

HMS Endeavour, auch bekannt unter dem Namen HM Bark Endeavour, war ein Forschungsschiff der Royal Navy . Auf seiner ersten Forschungsreise nach Australien und Neuseeland (1769 bis 1771) stand das Schiff unter dem Kommando von Lieutenant James Cook.

HMS Endeavour lief 1764 als der Kohletransporter Earl of Pembroke vom Stapel und wurde 1768 von der Royal Navy erworben, um den Pazifischen Ozean zu erforschen und nach der Terra Australis Incognita, dem dort vermuteten Südkontinent zu suchen. Die Navy benannte das Schiff um und stellte es als His Majesty´s Bark the Endeavour in Dienst. Die Endeavour verließ Plymouth im August 1768, umrundete Kap Horn und erreichte Tahiti gerade rechtzeitig, um den Venustransit im Jahre 1769 zu beobachten. Anschließende setzte sie ihre Fahrt in den weitgehend unerforschten Süden des Ozeans fort. Im Verlauf dieser Reise landete Cook auf den Pazifikinseln Huahine, Bora Bora und Raiatea und nahm sie für Großbritannien in Besitz. Im September 1769 ging die Endeavour vor Neuseeland vor Anker und war damit das erste europäische Fahrzeug seit Abel Tasmans Heemskerck 127 Jahre zuvor.

Im April 1770 erreichte die Endeavour als erstes Schiff die Ostküste Australiens, wo Cook in der heute als Botany Bay bekannten Bucht an Land ging. Anschließend folgt die Endeavour der Küste Australiens nach Norden. Nur knapp entging sie dabei einer Katastrophe, als sie am Great Barrier Reef auf Grund lief. Cook musste alle Kanonen über Bord werfen lassen, um das Schiff wieder frei zu bekommen. Anschließend setze er die Endeavour auf den Strand und ließ die notwendigsten Arbeiten am Rumpf ausführen. Am 10. Oktober 1770 erreichte er den Hafen von Batavia, das heutige Jakarta, um das Schiff fachmännisch instand setzen zu lassen. Die Besatzung wurde während dieser Zeit zum Stillschweigen über das entdeckte Land verpflichtet. Am 26. Dezember setzte die Endeavour ihre Fahrt nach Westen fort, umrundete das Kap der Guten Hoffnung am 13. März 1771 und erreichte schließlich das heimische Dover am 12. Juli nach fast dreijähriger Reise.

F

Le HMS Endeavour ou HMB Endeavour (Her Magesty Bark) est un trois-mâts carré britannique (le mot anglais bark ne fait pas référence à son gréement mais à la forme de sa coque). Il fut utilisé par James Cook lors de sa première expédition (1768-1771). Originellement conçu pour le transport de charbon, il est racheté et reconverti en 1768 par la Royal Navy afin d'explorer les mers du Sud et la mythique Terra Australis.

Le HMB Endeavour appareille de Plymouth en août 1768, formé d'un équipage de 94 marins dont 13 gens d'arme. Ses réserves sont prévues pour 18 mois, composées entre autres de volailles et d'une chèvre à traire. Le navire fait escale à Madère en septembre, à Rio de Janeiro, au Brésil en novembre. Le navire double, sans grandes difficultés, le cap Horn en janvier 1769. Cook et son équipage débarquent à Tahiti le 10 avril. Ils y restent durant trois mois, le temps d'observer le passage de Vénus, qui a lieu le 3 juin. Le 13 juillet, l'Endeavour quitte Tahiti. L'expédition croise ensuite l'archipel de la Société.

En octobre 1769, l'Endeavour atteint la Nouvelle-Zélande, terre découverte en 1642 par le navigateur hollandais Abel Tasman. Cook resta plus de six mois en vue de la Nouvelle-Zélande dans le but de la cartographier. Il en conclut que cette terre n'est en réalité que deux îles et non la Terra Australis tant recherchée. L'Endeavour continue son périple vers le sud-ouest pour atteindre Botany Bay (actuellement Sydney) le 28 avril. Le trois-mâts repart le 5 mai. Durant environ 4 mois, Cook cartographie les côtes de la Nouvelle-Hollande (ainsi était autrefois nommé l'Australie).
En juin 1770, le navire heurte un récif. Les dommages causés à la coque sont assez conséquent. L'expédition se voit suspendue. Les réparations seront effectuées au niveau de l'Endeavour River, sur la côte australienne. Du 10 octobre au 26 décembre 1770, le navire fait escale à Batavia (Jakarta) pour réparations. C'est pendant cette escale qu'un grand nombre de marins décèdent de la malaria. L'expédition se clôture le 12 juillet 1771 avec le retour de Cook en Angleterre.

NL

HMS Endeavour, ook bekend als HM Bark Endeavour, was een Brits Royal Navy onderzoekschip dat onder bevel van luitenant James Cook op zijn eerste ontdekkingsreis, van 1769 tot 1771 naar Australië en Nieuw-Zeeland een tocht maakte.

Gedoopt in 1764 als het kolenvrachtschip Count of Pembroke, werd ze in 1768 gekocht door de marine voor een wetenschappelijke missie naar de Stille Oceaan en het verkennen van het veronderstelde Terra Australis Incognita of het onbekende Zuid-land. Hernoemd als His Majesty's Bark Endeavour, vertrok het schip uit Plymouth in augustus 1768, voer rond Kaap Hoorn en bereikte Tahiti in 1769. Ze ging toen onder zeil naar de grotendeels onbekend oceaan in het zuiden, en stopte bij de Polynesische eilanden Huahine, Bora Bora en Raiatea die Cook zou opeisen voor Groot-Brittannië.

In september 1769 ging ze voor anker in Nieuw-Zeeland, waar 127 jaar eerder Abel Tasman met zijn Heemskerck het eerste Europese schip was dat de eilanden bereikte. In april 1770, werd de Endeavour het eerste zeeschip nabij de oostkust van Australië waar Cook aan wal ging in wat nu bekendstaat als Botany Bay.
De Endeavour zeilde toen noordwaarts langs de Australische kust. Ze kon ternauwernood een ramp ontlopen na het aan de grond lopen op het Great Barrier Reef, en daar nam men zeven weken de tijd om reparaties mogelijk te maken aan de romp. Op 10 oktober 1770, zeilde het schip de haven van Batavia in Nederlands-Indië binnen voor meer substantiële reparaties, haar bemanning werd tot geheimhouding verplicht over de gebieden die zij hadden ontdekt. Het schip hervatte haar reis naar het westen op 26 december, ging rond Kaap de Goede Hoop op 13 maart 1771, en bereikte de haven van Dover in Engeland op 12 juli, na een reis van bijna drie jaar.

I

La HMS Endeavour, nota anche come HM Bark Endeavour, era una nave oceanografica britannica della Royal Navy che il tenente James Cook comandò tra il 1769 e il 1771 durante il suo primo viaggio di esplorazione in Australia e Nuova Zelanda.

Fu varata nel 1764 come carboniera Earl of Pembroke, e la Marina la acquistò nel 1768 per una missione scientifica nell'Oceano Pacifico e per esplorare i mari del Sud a caccia delle prove dell'esistenza dell'ipotetico continente Terra Australis incognita. La Marina la trasformò in un brigantino a palo, la rinominò e la rimise in servizio come His Majesty's Bark the Endeavour. Con a bordo diversi scienziati salpò quindi da Plymouth nell'agosto del 1768, doppiò Capo Horn e raggiunse Tahiti in tempo per osservare il transito di Venere davanti al sole. Dispiegò quindi le vele verso quella parte dei mari del Sud ancora in gran parte inesplorata, fermandosi presso le isole del Pacifico di Huahine, Bora Bora e Raiatea che Cook rivendicò per la Gran Bretagna. Nel settembre del 1769 ancorò al largo della Nuova Zelanda: era la prima nave europea a raggiungere le isole dopo la Heemskerck di Abel Tasman 127 anni prima.

Quando nel mese di aprile 1770 Cook sbarcò in quella che oggi è nota come Botany Bay, l'Endeavour divenne la prima nave europea a raggiungere la costa est dell'Australia. Il vascello navigò poi verso Nord lungo la costa australiana ed evitò per un soffio un disastroso incagliamento sulla Grande Barriera Corallina ma Cook, per alleggerirla e liberarla, fu costretto a gettare alcuni dei suoi cannoni in mare.
Fu quindi spiaggiata sulla terraferma per sette settimane per consentire le prime sommarie riparazioni dello scafo. Ripresa la navigazione, il 10 ottobre 1770 entrò arrancando nel porto di Batavia, l'attuale Giacarta nelle Indie Orientali Olandesi, per le riparazioni più accurate mentre Cook faceva giurare al suo equipaggio di mantenere il più stretto riserbo sulle terre che avevano scoperto ed esplorato. Riprese finalmente il suo viaggio verso ovest il 26 dicembre, doppiò il Capo di Buona Speranza il 13 marzo 1771 e raggiunse il porto inglese di Dover il 12 luglio.
Era stata in mare per quasi tre anni.
