

REDS ENGINE BEARING TOOL KIT MANUAL

1. INTRODUCTION

Congratulations on purchasing REDS Racing bearing tool kit. This tools kit is specifically designed for 2.1cc and 3.5cc Rc Nitro Engines with the purpose of performing maintenance of bearings. REDS engine bearing tool kit has been projected, developed and tested by REDS Racing in cooperation with the best drivers in the world. The most advanced technologies and materials have been used to get the best reliability. Please read this manual carefully before using this tool kit and follow the safety precautions herein.

2. SAFETY PRECAUTIONS

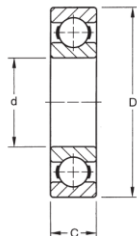

This product is a sophisticated hobby product and not a toy. It is not suitable for any other purpose. It must be operated with caution, common sense and some basic mechanical ability is required. Failure to operate this product in a safe and responsible manner could result in injury or damage to the product or property. This product is not intended to be used by children without direct adult supervision. It is essential to read and follow all instructions and warnings found in this manual prior use in order for the product to operate properly and to avoid damage or injury.

3. WARNINGS

Using hand tools can be dangerous. Always take care, and keep away from children. Wear protective eyewear and gloves in work area at all times. Select correct type and size of hand tool for work. Improper operations may cause personal and/or property damage. REDS Racing and its distributors have no control over the damage resulting from shipping or improper usage. REDS Racing assumes and accepts no responsibility for personal and/or property damages from the use of this product. By the act of using this product, the user accepts all resulting liability. If the buyer is not prepared to accept this liability, then he/she should return this product in a new and unused condition to the place of purchase. All specifications are subject to change without prior notice. All rights reserved. It is very important for you to read this instruction manual and follow all manual steps before operating.

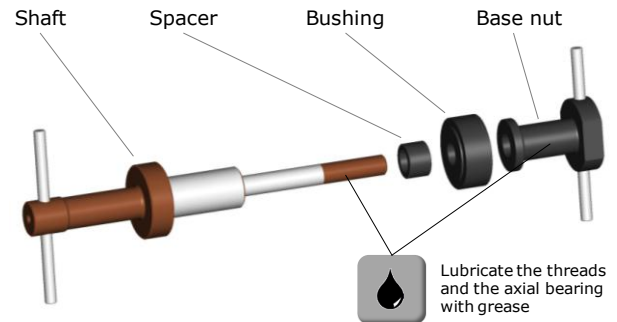

4. ENGINE BEARING TOOL KIT

REDS Racing bearing tool kit was developed to perform the usual maintenance on nitro engines. The set consists of one tool for removing the rear engine ball bearing and one tool to assemble the engine ball bearings and to remove front bearing. There are two separate sets available for 2.1cc and 3.5cc nitro engines. These sets are available for REDS Racing engines in standard configuration and for other engine brands. Please check bearings dimensions $\varnothing \times C$ [mm] to determine if a particular tool is necessary for your engine.

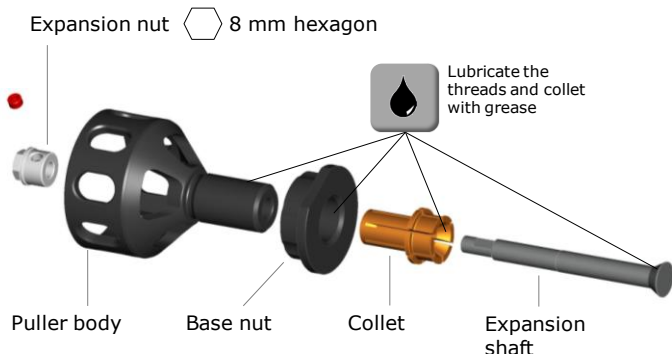

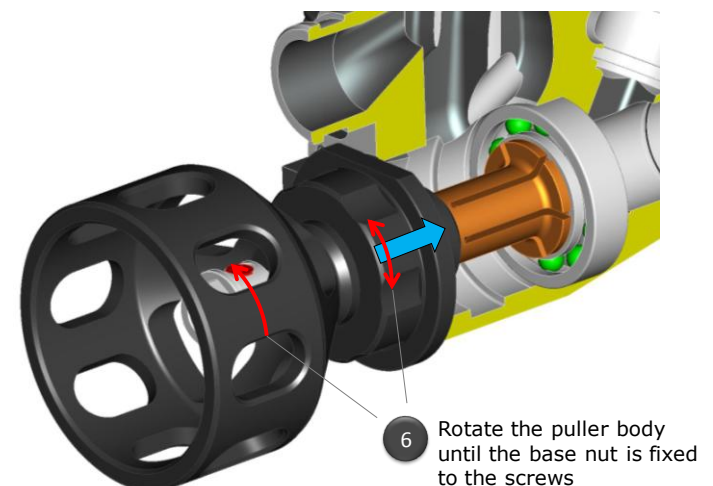

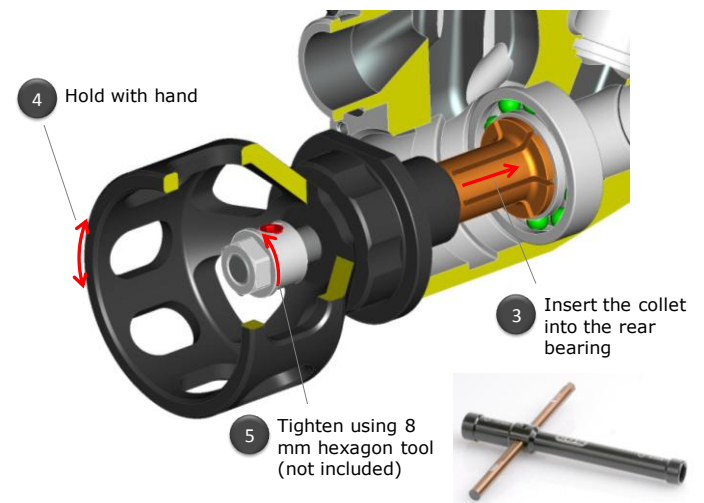

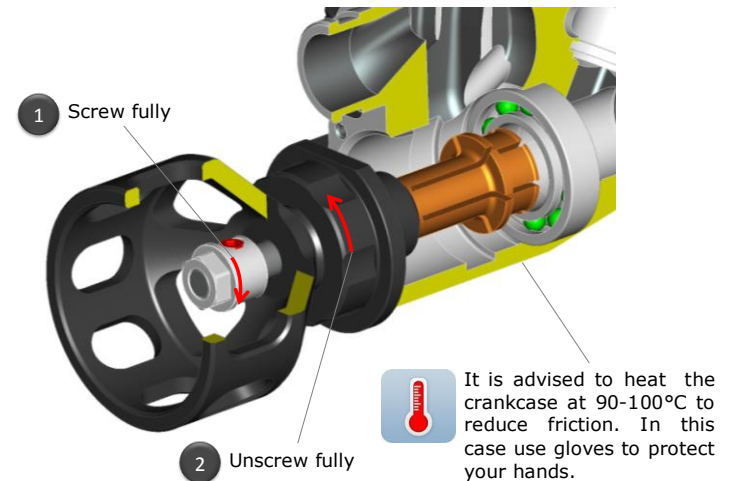

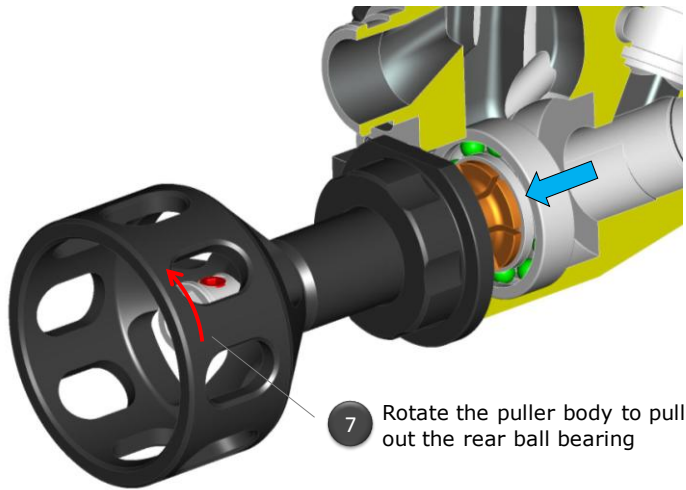

#Code	Description	Front $\varnothing \times C$	Rear $\varnothing \times C$	Rear Bearing collet
ENTL0002	2.1cc bearing tool kit	$\varnothing 7 \times 5$	$\varnothing 12 \times 5$	ENTL0004
ENTL0001	3.5cc bearing tool kit	$\varnothing 7 \times 6$	$\varnothing 14 \times 6$	ENTL0003

REDS Racing does not take any risk connected to defect, or any other engine problems caused by wrong servicing.

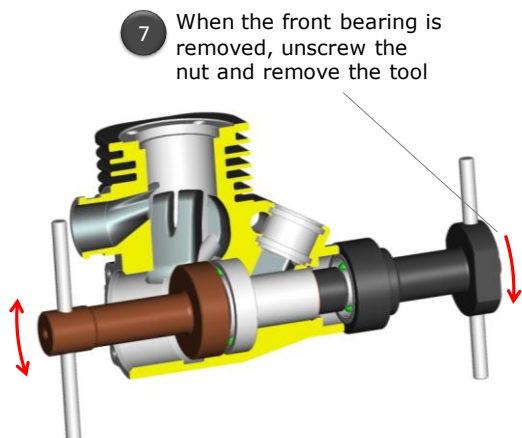

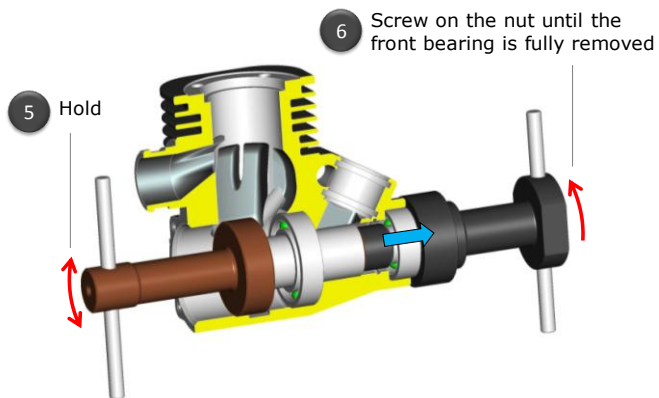

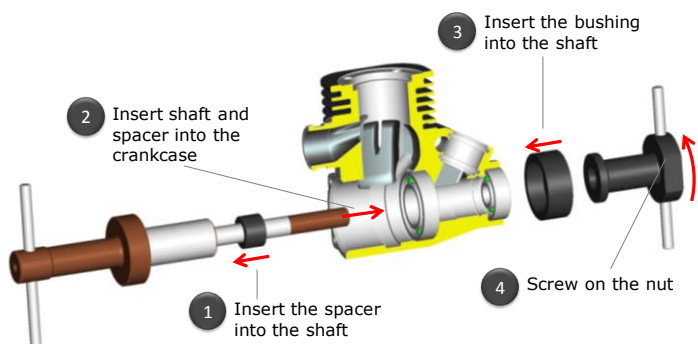

5. REAR BEARING DISMOUNTING

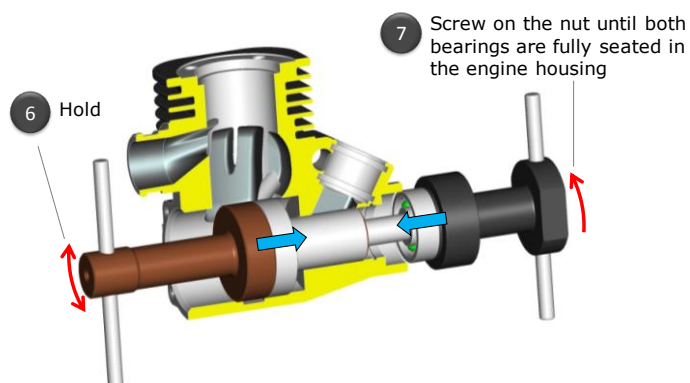

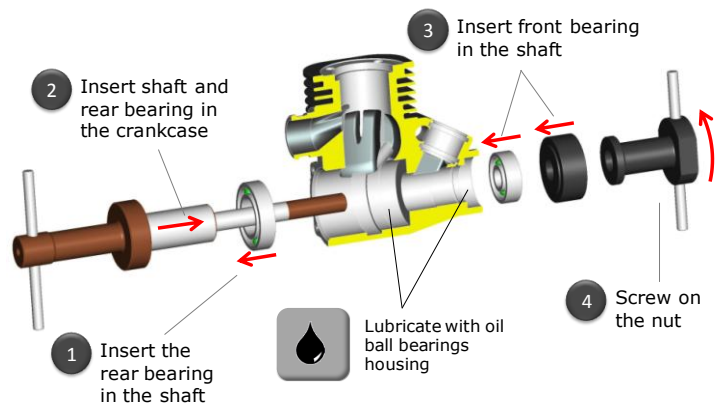

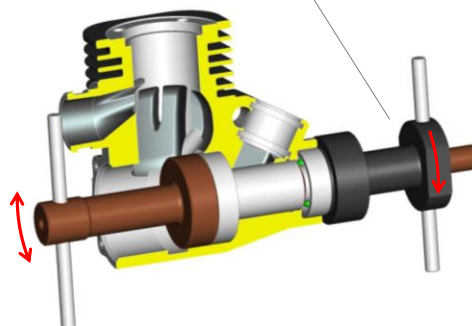

6. FRONT BEARING DISMOUNTING

7. BEARINGS MOUNTING

8 When both bearings are fully seated, loosen the nut and remove the tool.

8. WARRANTY

Warranty covers all manufacturing defects of any tool part which are found on first use. Warranty does not cover damage caused by improper tool use, improper or lack of maintenance, failure to comply with the instructions supplied with the product. No liability will be accepted for any damage or injury resulting from the use of this product. By the act of operating this product, the user accepts all resulting liability.
