

QUICK CONNECT DUO WIRING INSTRUCTIONS

1. Following the color coded wiring diagram provided on the Quick Connect Duo labels, plug the ESC RX and AUX wires into the appropriate pin headers. *Use the heat shrink provided to ensure secure connections.*
2. Plug corresponding RX and AUX cables into the appropriate channels of your receiver.
3. Remove power from the ESC and plug in Castle Link as needed (some ESCs may need power reapplied to establish link).

RX (Receiver Wire)		AUX (Auxiliary Wire)	
Brown	Ground	Brown	Ground
Red	Positive	Red	Positive
Orange	Signal	White	Signal

Castle Link
