292: CONSEJO - TIP - CONSEIL - TIPP - TIP - SUGGERIMENTI

Coloque los obenques uno a uno, alternando un lado y otro del barco. Si no lo hace de esta forma podría perder la posición vertical del mástil. Para realizar las uniones entre las vigotas 106 con el hilo 72 siga el esquema del capítulo anterior (página 98).

Place the shrouds one at a time and alternating from one side of the ship to the other. If you don't do it this way you could change the vertical position of the mast. The joint between the dead eyes (part 106) with the thread 72 must be done following the diagram from previous chapter (page 98).

Placer les haubans un par un et en alternant un côté puis l'autre du bateau. Ceci afin de maintenir droit le mât. Pour réaliser l'union entre les caps de mouton 106 et le fil 72, suivre le schéma du chapitre antérieur (page 98).

Schlagen Sie die Wanten einmal für jede Seite des Schiffes ein. Wenn Sie die nicht tun, können Sie die vertikale Position des Masten ändern. Für die Verbindung zwischen den Toten Augen (106) mit dem Faden (72) ist nach der Anleitung Seite 98 vorzugehen

Plaats de wanten een voor een van een kant naar de andere, anders kan de mast scheef komen te staan.

Bevestiging van het touw(72) aan de jufferblokken(106) moet gedaan worden volgens het diagram op pagina 98 van het voorgaande hoofdstuk.

Posizionare le sartie una alla volta e alternato da un lato della nave all'altra. Se non si fa in questo modo è possibile modificare la posizione verticale del albero. Il giunto tra le bigotte (parte 106) con il filo 72 deve essere fatto seguendo lo schema dal precedente capitolo (pagina 98).
